If we are out walking when the weather worsens Sarah Urwin will use her mobile phone to contact Richard Urwin and make him aware of our exact location. a safe distance or to the main office. Sarah Urwin will use her mobile phone to alert Richard Urwin, using a pre-arranged emergency code.

7. POWER FAILURE

In the event of a power failure, depending on where the session is based at that time, we will either:

- continue with the session as normal if it is outside, the weather is good and we don't need any power input
- or bring the session to a close if it is in any way reliant on a power source

We will bring the session to an end calmly, informing the client clearly about what we are doing and why, to reduce their possible anxiety levels.

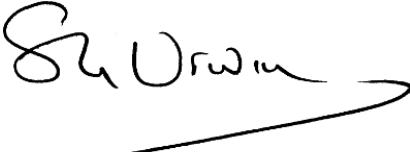

Depending on the time of day and time of year we will then move ourselves to either the office space or the covered tack room area of the main yard both of which have access to solar powered light.

8. CLINICAL WILL

A clinical will is in place for Sarah Urwin. This is to ensure that in the event of a significant accident, sudden illness, or death, her clients, supervisees, students and all relevant organisations will be informed and supported, both in the short and the medium term, to ensure their ongoing health and wellbeing.

In practical terms this means that all of the above mentioned persons will be supported by another counsellor/psychotherapist/therapist in the immediate aftermath of the incident and in the longer term they will be helped and supported to find another suitable therapist. This may just be for a short period of time, where illness is the issue, or longer term solutions where necessary.

A copy of this clinical will is available on request.
